The graph shows the relationship between pressure p (in bar) on the x-axis and flow rate I (in l/min) on the y-axis. The x-axis ranges from 0 to 5 bar with major grid lines every 1 bar. The y-axis ranges from 0 to 6 l/min with major grid lines every 1 l/min. The curve starts at the origin (0,0), rises steeply, and reaches a plateau of approximately 4.5 l/min at a pressure of about 0.8 bar. For pressures greater than 0.8 bar, the flow rate remains constant at approximately 4.5 l/min.
