The graph shows the relationship between pressure p (in bar) on the x-axis and flow rate I (in l/min) on the y-axis. The x-axis ranges from 0 to 5 bar with major grid lines every 1 bar. The y-axis ranges from 0 to 10 l/min with major grid lines every 2 l/min. The curve starts at the origin (0,0), increases rapidly, passing through approximately (1, 4.5), and reaches a maximum flow rate of 6 l/min at 2 bar. For pressures greater than 2 bar, the flow rate remains constant at 6 l/min.
